Phyn Plus
Smart water assistant + shut-off

Device Features

HD pressure sensing
Phyn Plus measures tiny changes in water pressure — 240 times a second — to alert homeowners the moment a leak is detected, mitigate costly damage through automatic shutoff, and diagnose potential plumbing issues before they become an issue.

Intelligence
Phyn Plus uses patented, high-definition pressure wave sensing to catch plumbing issues ranging from faucet drips to pinhole leaks to frozen pipe bursts.

Professional installation
Phyn Plus is installed by a member of the Uponor Pro Squad, a nationwide network of expertly-trained plumbers and water specialists.

Built-in shut-off valve
Phyn Plus features an easy-to-install, fully automatic shutoff valve that's designed to adapt to different fittings and plumbing materials (PEX, copper, PVC, etc.).

Leak alerts
Real-time mobile notifications alert homeowners to potential leaks, and give them the power to turn off their water remotely using the Phyn app.

Decade in the making
Phyn’s technology has been honed in the labs of the University of Washington and Belkin, the hands of plumbers, and the homes of beta testers.

Health checks
Daily diagnostic “health checks” notify homeowners of unsafe pressure levels and potential leaks before they become an issue.

Intelligence
Phyn learns about your plumbing system as soon as it’s connected, and gets to know the unique signatures of each fixture better over time to recognize the subtle differences between a bath filling and pipe leaking.

One device, whole home
One device monitors the entire home’s water from a single location on the main water line.

Product Specifications

ID: 20000272

Installation

Installer
Specialized water shut-off experts who know how to install Phyn Plus correctly and efficiently.

Location
Indoor/outdoor rated. Tested to withstand extreme heat, cold, humidity, wind and rain.

Orientation
Horizontal or vertical. Industry standard lay-length; can fit between existing and new construction wall-studs.

Fitting size
1” male threaded ends designed to adapt to different fittings and plumbing materials (PEX, copper, PVC, etc.).

Power
110/220V 19W power supply. 15 foot outdoor rated power cable. GFCI outlet recommended.

Features
Automatic + remote water shut-off
Easy set-up
Free Phyn app
Leak alert notifications
Single device, whole home protection
Plumbing “health checks”
Manual shut-off tool
External antenna port

Connectivity requirements
iOS 9 or later
Android 4.1 or later
Wireless Working Wi-Fi connection
802.11 b/g/n @2.4Ghz
Antennas Dual internal antennas
External antenna port (external antenna not included)

Shut-off Valve

Full bore construction
Electronic for remote control
Custom designed manual water shutoff tool

Display
RGB LED

Weight
2.2 lbs

Certifications
UL, FCC, NSF
Potable water safe

Warranty
2-year limited warranty
